

# Citation Layer Migration Checklist

How Law Can You Go — 25 Aug 2026

## Files to replace in repo

| File                                    | Status                          | Action                           |
|-----------------------------------------|---------------------------------|----------------------------------|
| src/content/entries/survival-001.md     | Retrofitted                     | Copy survival-001-retrofitted.md |
| src/content/entries/survival-002.md     | Retrofitted                     | Copy survival-002-retrofitted.md |
| src/content/entries/survival-003.md     | Retrofitted                     | Copy survival-003-retrofitted.md |
| src/content/debunks/debunk-001.md       | Retrofitted                     | Copy debunk-001-retrofitted.md   |
| src/content/debunks/debunk-002.md       | Retrofitted + fixed empty quote | Copy debunk-002-retrofitted.md   |
| src/content/debunks/debunk-003.md       | Retrofitted                     | Copy debunk-003-retrofitted.md   |
| src/content/debunks/debunk-004.md       | Retrofitted                     | Copy debunk-004-retrofitted.md   |
| CITATION_STANDARD.md                    | New                             | Add to repo root                 |
| src/content/templates/entry-template.md | New                             | Add to repo                      |

## Commands to run after copying files

```
cd ~/Documents/AI_Ops/how_law_can_you_go/how-law-can-you-go
cp /path/to/survival-001-retrofitted.md src/content/entries/survival-001.md
cp /path/to/survival-002-retrofitted.md src/content/entries/survival-002.md
cp /path/to/survival-003-retrofitted.md src/content/entries/survival-003.md
cp /path/to/debunk-001-retrofitted.md src/content/debunks/debunk-001.md
cp /path/to/debunk-002-retrofitted.md src/content/debunks/debunk-002.md
cp /path/to/debunk-003-retrofitted.md src/content/debunks/debunk-003.md
cp /path/to/debunk-004-retrofitted.md src/content/debunks/debunk-004.md
cp /path/to/CITATION_STANDARD.md CITATION_STANDARD.md
mkdir -p src/content/templates
cp /path/to/entry-template.md src/content/templates/entry-template.md

git add -A
git commit -m "Retrofit all entries to compliance-grade citation standard v1.0"
git push
```

## What changed in every receipt

- source -> instrument (canonical name)
- Added offset (section/paragraph or page/line anchor)
- Added repeal\_checked (date)
- Added repeal\_status (active/repealed/amended/superseded/uncertain)

- Added `verdict` per receipt (supports/contradicts/qualifies/silent)
- Added `review_date` per receipt
- Added `source_verified` boolean
- Added `notes` field

#### **Critical fix**

- `debunk-002.md` had an empty `quote` string. This is now a documented negative finding with empty quote permitted under the negative-finding exception.

#### **Next: LegiScan ingest lock**

Update the nightly workflow to output receipts in this exact schema. Any new entry that does not validate against this schema must fail the build.
